ABOUT ME

Recent Bachelor of Computer Science graduate with customer facing, sales and regulated financial services experience. Delivered end-to-end web applications and AI-powered tools for clients, developing projects from setup through production deployment. Seeking graduate, internship or other tech aligned roles.

WORK EXPERIENCE

ZL Gamsat Tutoring **2026**
Software Development (Freelance)

- Built and shipped a full production marketing site for a GAMSAT tutoring company using React, Vite, Tailwind CSS, and React Router, covering home, pricing, about, and inquiry pages: https://www.zlgamsat.com/
- Owned the project end to end from setup through deployment, working directly with the client on copy, layout, and scope.
- Developed a GAMSAT Section 2 AI essay feedback tool in Next.js, React, and TypeScript, using Zod to validate both API input and AI model output.
- Designed a provider AI layer and prompt structure to reliably extract structured, tutor style feedback tied to exact essay excerpts, with no scores or grades as requested by the client.

Insignia Financial **2023 – 2025**
Customer Solutions Specialist

- Insignia Financial Ltd provides a broad range of financial services, focusing on superannuation and investment management in Australia.
- Processed beneficiary checks and conducted accurate data entry across financial records.
- Verified and cross-checked sensitive information to ensure data integrity and compliance.
- Contacted superannuation holders to assist with administrative tasks and clarify documentation.
- Maintained detailed records and performed updates in internal systems with high accuracy.

Insignia Financial **2021 – 2022**
Customer Solutions Specialist

- Suncorp Group provides insurance and banking services across Australia.
- Handled inbound calls in a contact centre, balancing new policy sales for motor insurance with servicing for new and existing customers.
- Answered customer enquiries and processed policy changes accurately, using detailed knowledge of multiple insurance products.
- Worked in a Linux based system and picked up new tools quickly, also consistently met sales and service targets.
